Archives' records showed that the Assessment
Branch of Training Office has an assessment
report on him. I called that office and find

they only have an assessment report on him for a projected assignment. It was "excellent" for the specific assignment, but they did not say how he actually did on the assignment. It was a PM type of assignment.

Archives did say they had a note in their file about an assessment on him which said it should be raised from "excellent" to "superior."
